	Urgent	Not Urgent
Important	Do - (Your MVP) ● Add an application with company, role, date applied, status, and follow-up date ● Save applications to a file and load them when the app starts ● Update an application's status as it moves through stages (ex: applied, interview, offer, rejected) ● Provide alerts for applications that go past the follow-up date or have no response after a certain number of days	Schedule - (For V2.0+) ● Search and filter applications by company, status, or date ● Create a stats page with applications per week and response rate ● Recruiter contact fields for each application ● Separate tracking for application deadlines, which is different from the follow-up date
Not Important	Delegate - (Use a library) ● Use Javalin for the web server ● Use Gson to save information to a file ● Use Bootstrap for page styling purposes ● Use Chart.js to show how many applications are in each stage	Delete - (Cut it) ● Automatically gather job postings from apps like LinkedIn or Handshake ● Email or text notifications ● User account creation ● AI resume and job matcher
